

## TECHNICAL DATA SHEET

### CANNULA TEST

- 
- PRODUCT CODE** : 4AC
- RELATED STANDARDS** : 4A Medical Cannula Test is under the scope of ISO 13485 AND 9001 standards.
- INTENDED USE** : Cannula test is used to control whether cleaning process is successful or not.
- OPERATION CONDITIONS** : Surgical devices are placed into the wire basket before washing process. Cannula Test is used with device called cannula. Cannula Test is removed from the aluminium foil. It is placed into the cannula device and then in wire basket. It is sent to the washing process. If there is any residue on the washer test after washing process, it means that washing process is not successful and it should be repeated. If there is no residue it means washing process is successful.

**Before Washing**

**After Washing**

- STORAGE AND DISPOSAL** : Each chemical cannula test is disposable (single use only). Do not use damaged products. Keep products at room temperature 25°C. Each box contains 100 pieces.
- PACKAGING** : Cannula Test is packed individually and then in aluminum pack as 100 pieces.
